

Action for PSE Change WORKSHEET

Step 6: Implement – Take Action

Use this worksheet as you consider how to carry out your PSE change activities.

Have you done due diligence to prepare to implement your goals and objectives? Consider the following:

- Have you developed a detailed PSE agenda and action plan detailing all that needs to take place to meet your objectives?
- Has enough awareness-raising taken place among stakeholders about the issue and the need for PSE change?
- Are stakeholders committed and engaged? – If yes, this will help ensure success
- Are partners committed to maximizing what they can bring to the project?
- Have sufficient resources been established to ensure successful implementation and sustainability of the PSE change effort?

As you prepare to carry out your planned activities, what is your overall vision for success? Consider the following:

- What are some potential short-term successes and what do they mean for the overall PSE change process?
- What are some potential long-term successes and what do they mean for the overall PSE change process?
- How will you determine if additional resources are necessary to sustain change?
- How will you continuously engage stakeholders and keep momentum going?
- How will you adapt to a changing environment?
- What would it look like if your efforts were not successful?

Notes:
