What should be considered when choosing an evidence-based intervention for a particular setting?

- How much evidence is available and the quality of the evidence
- The university that sponsors the research behind the evidence
- The methodology used to perform the research behind the evidence
- Whether the evidence is from the United States of America

---

The Evidence-Based Cancer Control Program (EBCCP) website contains information about:

- Publications describing programs tested in research studies
- Original datasets of tested programs showing effectiveness
- Budget information on research studies showing effectiveness
- Comprehensive Cancer Control Plans describing evidence-based programs

---

Which of the following is a suggested place to find interventions for a cancer screening program?

- Google
- Health resources and services administration
- Unpublished conference proceedings
- Evidence-based cancer control programs
